## Dixie HomeCrafters Offers High Performance Roofing

(Atlanta, GA) June 3, 2009 – As one of the fastest growing home improvement companies in America, Dixie HomeCrafters is offering a new roofing system that provides value and performance with a distinctive wood look. GAF-Elk Timberline® Prestique® 30 High Definition® Roofing Shingles are architecturally stylish but practically priced, and feature GAF-Elk's patented "High Definition" color blends and enhanced shadow effect.

"Homeowners are choosing Timberline® Prestique® 30 Shingles for their superior strength that resists cracking and splitting," says Hugh Harris, CEO of Dixie HomeCrafters. "They also have UV blockers which protect against damaging sunlight and maintain the true color of the shingle longer."

Timberline® Prestique® 30 High Definition® Roofing Shingles have a Class A fire listing from Underwriters Laboratories, the highest rating in the industry. They are made with SpecSelect Grading System asphalt which improves weathering in harsh conditions. Timberline® Prestique® shingles also come with a 30-year transferable warranty with Smart Choice® Protection.

"This is a product that can save you significant amounts of money over time," Harris says. "It is an investment in your home that will last for years to come."
